

Nature, built from cards.

40 CC0 source models for future foliage reduction experiments. Original geometry and textures stay intact; the manifest records material and opacity hookups separately. Trees include their complete authored trunk, twig and leaf assemblies.

8 grasses · 6 ferns · 8 shrubs · 6 trees · 6 flowering plants / weeds · 6 leafy branches

Source previews · Vertices: **original source data** · Split: unassigned · No SCORE

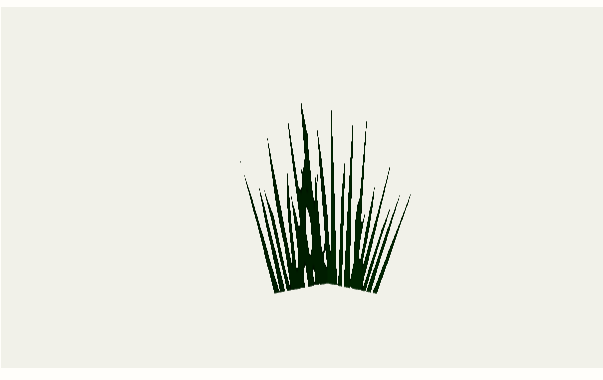

Six geometry-only LOD demonstrations are on the [research board](#). Opacity-aware reduction and scoring remain future work.

Previews use the selected source geometry, base-color textures and recorded opacity mappings. Two-sided display and any assumed 0.5 alpha cutoff are presentation choices, not material corrections or quality audits. Details identify missing source hookups.
